Strengths, Value Prop & Key Highlights

Experiences gained across APJ and Global markets

A black and white photograph of a dragon boat race. Two teams of rowers are visible on a body of water. The boat in the foreground is closer to the viewer, showing the rowers' synchronized movements and the dragon's tail at the stern. The boat in the background is further away, with its dragon head at the bow. The water is splashing from the oars.

Recommend expansion into Malaysia

Take advantage of existing market - recommend Thailand as next launch post-Malaysia

Drivers for Malaysia recommendation:

1. **Large TAM for Application market:** in 2022 = \$1.5B, roughly the size of NZ. Indicates existing customers across Ent and SMB
2. **Digital Infrastructure:** On par with Thailand in relation to Wireless Broadband penetration, Internet users, broadband speed
3. **Digital/Tech skills:** ranked in the 2nd quartile for Digital readiness, outperforming other ASEAN nations (ex-SG) - higher remote work readiness included in this view
4. **Talent availability:** ranked in top quartile for Science graduates, Women with degrees and employee training - coupled with large knowledge worker base

Recommend Salesforce entry into Malaysia

Highlighted Malaysia & Thailand as possible entry points
